Unsere Leisten

Die abgebildeten Profile sind **nicht** im Maßstab 1 : 1!

Die Bilderleisten werden in den Längen ca. 2,50 / 2,75 und 3,00 m geliefert.

Wir liefern nur Meterware, bitte geben Sie im Einkaufkorb die gewünschte Menge an.

Folgende Holzarten bieten wir unter anderem an:

Ayous / Apachi (-03) leichtes, weicheres Holz für Naturverarbeitung und Farbfehlern (Bläue u. Braunflecken) zur deckenden Verarbeitung. Kann zum Verzug neigen.

Ilomba (-07) etwas schwerer und fester als Ayousholz, kaum für Naturverarbeitung geeignet wg. Farbunterschieden und Flecken, jedoch verzugsfrei.

Ramin (-01) schwerer und härter als die vorgenannten Hölzer, Farbe hell gelblich, zur Naturverarbeitung (lasieren) gut geeignet, auch mit Bläue zur deckenden Verarbeitung.

Profile ab einer Breite von ca. 35-40mm werden wg. des Gewichts und der Schwierigkeit beim Stanzen kaum in Raminholz angefertigt.

Die Holzarten Ilomba und Ayous werden mit dem Wurmmittel "Am-Lignex DEFEND farblos" behandelt.

Die Anlieferung erfolgt meist in 2-3 Tagen per Spedition.
